20 per cent. Discount on Orders of Trees of 100 and Over

Varieties of Fruit Trees Adapted For South Carolina Greenville Nursery Company

Greenville, South Carolina

To Our Friends and Patrons:

In offering this little Leaflet we extend thanks for past favors and courtesies, with the assurance that in the future we shall spare no effort in furnishing superior quality and service.

Our stock is carefully selected and grown under conditions which should insure most excellent results.

Packing and shipping will receive our utmost care, and we are always willing to give you the benefit of our experience in regard to selections suitable for your requirements and the care necessary for success.

This leaflet and special price list of some of the leading and most commonly used fruits grown by the people of SOUTH CAROLINA, and the prices named are specially low for the benefit of the farmers who wish to obtain first-class FRUIT TREES reasonably.

Of course this means that Cash or its equivalent must be sent before the trees are shipped, we will book your order any time and notify you when we are ready to ship, and the amount of your bill and on receipt of your remittance will ship promptly, these trees are guaranteed as represented or money refunded, make your order on blank sheet enclosed.

While we exercise the greatest diligence and care to have our Trees true to name, it is mutually agreed between ourselves and customers that our guarantee of genuineness shall in no case make us liable for any greater sum than the price originally received for stock that may prove untrue.

APPLE TREES

2 Year, 4 to 5 Feet High, 35c. 1 Year, 3 to 4 Feet High, 25c.

EARLY HARVEST—A widely known standard early Apple, valuable for its large size, excellent flavor, and is a sure and heavy bearer. Fruit, pale yellow streaked with dull red. Time of ripening, June. Early Harvest is universally popular.

YELLOW TRANSPARENT—This is a very fine Apple, indeed, good quality, good size, beautiful, with a yellow tint. A sure bearer. A really delicious Apple. Ripens in June.

RED JUNE—Famous for its striking beauty and also for its sprightliness of flavor. With a coat of flaming red and meat of purest white, it is one of the best known and the most popular of Apples. A good bearer, and though only of medium size, a very valuable Apple for home use or to sell. Ripens in June, as its name shows.

RED ASTRAGAN—A large yellow Apple, with crimson cheek. Very attractive looking and of good quality. Ripens in June.

HORSE APPLE—A large, old Apple, famous for its fitness for cider, pies, drying, and for all culinary purposes. When allowed to mellow to deepest gold it is a delicious eating Apple. We have the genuine old-time Horse Apple of our daddies and grand-daddies. Ripens in August.

FALL APPLES

GRIMES GOLDEN—A large, golden-yellow Apple of exquisite flavor, ripening in October. A heavy bearer, and in all respects an Apple of genuine value. and of the very best of its season.

ROME BEAUTY—Large red Apple with stripes, resembles Ben Davis in color. One of the very best of its season.

TERRY'S WINTER—Originated in Georgia; medium size, Sub-acid; red, best quality. An excellent market variety. Most prolific. November 1st.

WINTER BANANA—Large yellow Apple, with red blush, fine flavor, good keeper.

DELICIOUS—A new Apple. Is considered by Apple growers one of the finest. Good flavor, yellow with few stripes. Good keeper.

WINESAP—Named for its delicious sprightly winey flavor. A standard fall and winter Apple. Universally known and popular and liked by everybody. In fact Winesap has everything in its favor, name, flavor, appearance, and productiveness. Winesap is an immense and is a never-failing bearer of large flaming Red Apple, which color up months before they ripen, making the tree a most striking and ornamental sight throughout the whole summer and fall. No one can go amiss when he plants Winesap. It keeps all winter.

STAYMAN'S WINESAP—A seedling of the famous old standard Winesap. Similar to it in many respects. A heavy and sure bearer and a fine keeper. Thrives in all soils, climates, like Winesap. Every orchard should contain some Stayman Trees. The fine flavor and beautiful appearance of this Apple makes it a good seller, and no variety could surpass it for home use. Keeps until Apples come again.

ROYAL LIMBERTWIG—A very large pale yellow Apple, speckled with red. Flavor rich, juicy and equal to the very best. A very fine Apple, keeping all winter.

JOHNSON FINE WINTER YORK IMPERIAL—A very large round, flattish, whitish Apple, speckled with red. Meat yellowish, and of excellent flavor. Keeps till Apples come again.

YATES—A small, red winter Apple, famous as a keeper, and for its most delicious flavor.

ARKANSAS BLACK—Said to be a seedling of Winesap, which it resembles in appearance and flavor. A very large, blackish-red Apple of first-rate flavor. Ranks with those fall Kings: Winesap, Stayman Winesap, and York Imperial, surpassing all others as they do in few great essentials of a first-class fall and winter apple, productiveness, flavor, beauty, and keepingness if we may be allowed to coin a much-needed word.

BEN DAVIS—An old variety. Red, with stripes, large, good keeper.

SIBERIAN CRAB—Grows in clusters with long stems. Makes the best and most beautiful of preserves.

PEACH TREES

1 Year, 2 to 3 Feet, 15c. 3 to 4 Feet, 25c. 2 Year, 4 to 5 Feet, 35c.

MAYFLOWER—The earliest peach known. Color, deep red. Ripens from the 20th of May until the 1st of June.

SNEED—This is recognized as one of the Standard early Peaches over the whole country. It follows Mayflower closely. Ripens early in June. It is of good size and is unusually productive. A fairly well colored Peach, which is so luscious that when ripe it can be drunk like an orange.

GREENSBORO—This is a glorious Mid-June Peach. In size it ranks among the largest. Its color is an exquisite cream and crimson. Its quality is luscious and melting. Succeeds generally throughout the country clear to the Gulf of Mexico. Ripens middle of June.

CARMAN—A very brilliant creamy Peach and crimson, of excellent flavor, soft and nearly free stone when ripe. Equally good for home use and market, being firm and fine shipper. Does splendidly throughout the country clear to the Gulf of Mexico. Ripens last of June.

BELLE OF GEORGIA—Another of the great Cream Peaches, and an excellent showy Peach, and a good one too. An excellent shipper, firm and a good carrier, though a free-stone, and soft and luscious when thoroughly ripe. Succeeds generally throughout the country, down to the Gulf.

ELBERTA—Easily King of its ripening season. A mammoth gold and crimson Peach, of excellent quality and flavor. Famous for its vigorous growths, immense productiveness and adaptiveness to all soils and climates. Great for home use and market, and for all other purposes. Thrives generally and even as far South as Florida. Free-stone. Ripens August 1st.

SOLOWAY—Large, yellow, Free-stone Peach. Ripens Sept. 1st.

EATONS GOLDEN—Medium; skin yellow, with occasionally a few pink spots; flesh yellow, sweet, juicy, apricot flavor. Superior for canning. Cling stone. Middle of September.

BURK'S CLING—A mammoth white and red peach of shady appearance and good quality. Late July and early August Cling stone.

MAMIE ROSS—Large white. Shade Carmine, flesh pink, juicy and of good quality. Ripens early in June.

MAMMOTH CLING—Large white cling. Ripens September 1st. Has never been known to miss a crop. Originated in orchards of J. Garraux, Greenville, S. C. You can make no mistake in buying this Peach.

FOX'S SEEDLING—Large white cling. Sure bearer, good shipper, ripens last of August to first of September.

- ✶ **EARLY BELL**—Finest Dessert Peach grown. Ripens July. Free-stone.
- ✶ **GLOBE**—A very large, soft Peach, clear seed, excellent quality. Ripens early in August.
- ✶ **MATTHEW'S BEAUTY** or **GOLDMINE**—Another excellent red and yellow Peach. Ripens last of August. Free-stone.
- ARP BEAUTY**—Arp Beauty seems to fit a long-felt want for an early Peach, and is the tree for extensive planting to supply the market ahead of Elberta. Fancy prices will surely prevail. The best peach-men of East Texas are planting largely. Arp Beauty is a large free-stone Peach, red cheek, yellowish flesh with distinctive yellow peach flavor and order. Ripening twenty-five days before Elberta. It's heavy and regular bearer. A chance seedling of the China type, originated in East Texas, evidently closely related to Elberta.
- STINSON'S OCTOBER**—Finest of all October Peaches. A large white, well-flavored, for any season, doubly valuable because it ripens later than any other Peach. Cling stone. Ripens first half October.

PEAR TREES

1 Year, 3 to 4 Feet, 40c. 2 Year, 4 to 5 Feet, 50c.

- EARLY HARVEST**—A large, yellow, pink-cheeked Pear of good quality. An exceedingly handsome variety in both tree and fruit. Ripens early in June. The extreme earliness far ahead of all other kinds, gives it a high value for home use and for market.
- LECONTE**—Strikingly beautiful in tree and fruit. Immensely productive, of very large, yellow Pears of fine quality. Ripens in September. Most universally successful of all Pears, except Keiffer.
- GARBER**—Of Oriental origin, like Leconte and Keiffer, and like them amazingly productive. A large yellow, pinkcheeked Pear of excellent flavor, rich, juicy, and luscious. September.
- KEIFFER**—The largest, handsomest and most productive of all Pears. A huge lump of GOLD, brilliantly tinted with red when ripe. Ripens late in October and November, and keeps well all winter. Trees easy to live, quick to grow off, an early bearer. We know of single trees of Keiffer that bear over ten bushels year after year without ever failing. Good quality when ripe. This superb fruit the King of all late Pears has been discovered to have one immense advantage over all other Pears, and indeed of most other fruit—the tree is said to be proof against San Jose Scale.
- MAGNOLIA**—Large yellow Pears. Ripens September.
- KOONCE**—Similar to the Early Harvest. A very fine Pear, ripening in June.
- SECKLE**—A small, brown russet-red Pear, popular for its sweet flavor. Late August.
- FLEMISH BEAUTY**—Large; melting; sweet; handsome. August.

CHERRY TREES

1 Year, 2 to 3 Feet, 40c. 2 Year, 3 to 4 Feet, 60c.

- YELLOW SPANISH**—Large, yellow, ripens about 15th of May.
- EARLY RICHMOND**—A fine, large red Cherry of brilliant color. Ripens in May.
- MAY DUKE**—A very fine, large dark red Cherry that succeeds and bears heavily over a wide region. Ripens in May.
- GOV. WOOD**—A very handsome, large yellow Cherry of sweet flavor.
- BLACK TARTARIAN**—Another splendid large black Cherry, of same habits as Early Richmond. Ripens in June. A standard Cherry, most uniformly successful of all.

PLUM TREES

1 Year, 3 to 4 Feet, 30c. 2 Year, 4 to 5 Feet, 40c.

- RED JUNE**—The earliest of the Japan group of Plums, ripening in June. Size very large. Color, flaming red. Quality, very good. A sure and exceedingly heavy bearer. Valuable for home use or market, on account of its earliness, beauty and general appearance.
- CLIMAX**—A cross between the Japan and our native Plums. Originated by Luther Burbank. Climax ripens soon after Red June. In size, in magnificent coloring, in enormous, amazing productiveness, and in exquisite flavor, it ranks with the best.
- BURBANKS**—Large as a peach. Originated by Luther Burbank. Ripens July.

ABUNDANCE—Very large and of indescribable beauty. Closely follows Red June in ripening, and remains bearing long time. Rightly named for immense productivity. Quality good, probably equal to any fruit that grows. Begins to bear on good soil at two years old, and rarely or never fails to produce large crop of best fruit.

DAMSON SHROPSHIRE—The finest and most productive of all the Damsons. Family grown, chiefly for preserving, for which it has no equal.

LANDSCAPE SERVICE

We have secured the co-operation of a graduate Landscape Architect in working up plans for our patrons. The charges for these services is an added percentage where planting plans only are desired, but for larger grounds and estates, necessitating a survey and involving the design and location of buildings, pergolas, drives, walks, formal gardens, etc., special arrangements can be made on application.

We desire to recommend this service to you, knowing that far better and more permanent results are obtainable by this method of work. Our assistant has had over fifteen years experience in the South, associated with the leading Landscape firms in the country. His work includes the designing of Cemeteries, Parks, and Boulevards, Play Grounds, Private Estates, Country Clubs and Golf Links, Schools and Colleges, and public institutions, such as for the blind, Training Schools, Tuberculosis Sanatoriums, Etc. Also the planning of Real estate subdivisions, Municipal improvements and Street plans for Cities.

Viburnum Plicatum —Japanese Snowball—A medium height shrub, large flowers in early spring----		.50	.75		
Weigelia Rosea — Diervilla Florida —Rose colored flowers in late spring, which completely cover the plant—Very attractive -----		.50	.60	.75	
Weigelia Eva Rathke —A red flowering variety, which does not grow quite as tall as Candida----		.75	1.00		
Weigelia Candida —The tallest of the Weigelias, white flowers -----		.50	.60	.75	

BROAD LEAF EVERGREENS

All evergreens should be dug with a ball of earth attached, and thoroughly bur-lapped, in order to make transplanting safe. While this is expensive, we believe it worth the additional trouble, and our prices below are for plants handled this way.

	—SIZE IN FEET—				
	1-1 ½	1 ½-2	2-3	3-4	4-5
Abelia Grandiflora —Free Flowering Abelia----- (This is one of the most desirable plants on account of the free flowering quality. Small, white flowers appear throughout the summer.)	.50	.75	1.50	2.00	
Aucuba Japonica —Gold Dust Tree----- (These plants we are able to supply in both the plain green and the variegated leaf forms. They are especially suited to shady situations.)	2.50				
Cerasus (Prunus) Caroliniana —Cherry Laurel— Small plants, 18-24 in., 50c—A small native evergreen tree, or large shrub; glossy green foliage the entire winter; used extensively for screen plantings -----					
Crataegus Lalandi —Evergreen Hawthorne—A tall shrub or small tree, covered with white flowers in spring, followed by bright orange fruit, which is very persistent -----	.75	1.50	2.50	3.00	
Euonymus Argentea —Silver Leaf Euonymous ----	.50	.75			

BROAD LEAF EVERGREENS

	—SIZE IN FEET—				
	1½-2	2-3	3-4	4-5	5-6
Gardenia Florida —Cape Jasmine—The old fashioned Jasmine, which is known throughout the South -----		1.00	2.00		
Ilex Opaca —American Holly—The native holly. Our stock has been transplanted and can be moved with safety -----		1.00	2.00	3.50	4.00
Laurocerasus —English Laurel—A broad leaf evergreen which is perfectly hardy. Very desirable for shrubbery massing and for background planting -----		3.00			
Ligustrum Japonicum —Japanese Ligustrum—A very desirable broad leaf evergreen for screen and back-ground planting. A fast grower -----		1.00			
Ligustrum Napalense —Foliage smaller than Japonicum; not as tall grower, but more compact. Dark green foliage, does not turn brown in winter. The black fruit is very persistent -----	.75	1.00			
Ligustrum Lucidum —Very similar to Napalense, except that the foliage is somewhat larger, and will stand more cold -----	1.50	2.50			
Magnolia Grandiflora —Southern Magnolia (see trees). The Evergreen Magnolia of the South.					
Mahonia Aquifolia —Holly Leaf Mahonia—A plant with prickly foliage similar to Holly, which turns purple in autumn. Yellow flowers in early spring. Does well in the shade -----	1.25				

CONIFEROUS EVERGREENS

The prices below include digging with ball of earth attached, which will be securely burlapped to hold the soil firmly around the roots.

	1-1½	1-2	2½-3	3-4
Biota Orientalis —(Thuya)—Chinese Arborvitae, Pyramidal shape; tall grower; does not turn brown in winter, as some other Arborvitae-----	1.00	1.50	3.00	3.50
Biota Aurea Nana —Dwarf Golden, very compact, the best of the golden varieties -----	1.00	2.00	3.00	3.00
Biota Filiformis —Weeping or Thread-Branched Oriental Arborvitae -----	1.00	1.50	3.00	
Biota Rosedale —Bluish-green Foliage—Suitable for boxes, urns and jardinieres -----	1.00	2.00	3.00	
Cupressus Lawsoniana Glauca —Blue Lawson's Cypress. A very symmetrical and beautiful evergreen -----	1.00	2.00	3.00	
Juniperus Communis —English Juniper—A columnar shaped plant with bluish green foliage-----	1.00	1.50	3.00	
Juniperus Herbernica —Irish Juniper—Similar to the above, but the foliage is somewhat shorter, and does not stand the sun quite as well as the above -----	1.00	1.50	2.50	
Juniperus Oblonga —Spreading Juniper-----	1.00			
Juniperus Prostrata —Trailing Juniper—Fine for partial shade and rockeries, strong plants, \$2.00; extra heavy, \$2.50				
Retinosporo Filifera —Thread-branched Japanese Cypress. A beautiful plant of drooping habit—very graceful-----			3.00	

CONIFEROUS EVERGREENS

	—SIZE IN FEET—				
	1 ½-2	2-3	3-4	4-5	5-6
Retinosporo Filifera Aurea —A Golden variety of the above, but does not grow to be very large-----		3.00			
Retinosporo Pisifera —A plain green variety, which attains considerable height; fast grower and a very desirable conifer -----		3.00	4.50		
Retinosporo Pisifera Aurea —The same as the above, except of golden cast -----		3.00			
Retinosporo Plumosa —Same as Pisifera, except the foliage is somewhat finer and more plume-like -----		3.00			
Retinosporo Squarrosa Veitchi —Foliage silver blue; very fine and feathery. Does well in partial shade -----		2.50			
Thuya Occidentalis —A very tall and fast growing variety of Arborvitae plain green -----		3.00			
Thuya Occidentalis Globosa —Globe-shaped Arborvitae Dwarf grower -----	2.00	2.50		3.00	
Thuya Occidentalis Hoveyi —A medium growing variety with a round top; very similar to globosa, except a taller grower -----		2.50			
Thuya Occidentalis Pyramidalis —Pyramidal Arborvitae—A symmetrical plain green Arborvitae, growing to considerable height -----		2.50	3.50	5.00	
Tsuga Canadensis —Hemlock Spruce-----		2.50			

VINES

Ampelopsis Veitchi —Boston Ivy -----	2 year size	\$.50
A deciduous vine suitable for covering stone and brick walls.		
Bignonia Grandiflora —Trumpet Vine-----	2 year size	.50
A comparatively new variety with large orange colored flowers.		
Clematis Paniculata —Japanese Clematis-----	2 year size	.50
Fine feathery white flowers in summer and fall.		
Clematis Jackmani —Purple Clematis-----	2 year size	.50
A rather dwarf growing vine with dark purple single flowers.		
Wisteria Chiensis -----	2 year size	.50
Chinese Purple Wisteria. Flowers appear before the foliage in early spring.
